About me

Michael is a clinical psychology PhD with expertise in data science and scaling mental health supports.

Education

2014-2020 PhD - Clinical Psychology

University of Texas at Austin

2011-2013 MA - Clinical Psychology

American University

2008-2011 BA - Psychology

American University

Work Experience

2020-2021 Principal Data Scientist

Lab for Scalable Mental Health

2019-2021 Consulting Data Scientist

Institute for Mental Health Research

2019-2020 Data Scientist

Lab for Scalable Mental Health

Projects

- Created an automated screener for suicidality in text data using tree-based and neural network models that saved 20 hours of “by hand” work per week: [Link to Shiny App](#)
- Developed a scalable time series forecasting pipeline using tsfresh feature engineering and a random forest algorithm versatile enough to be used across multiple organizations: [Link to Pipeline Code on Github](#)
- Gave invited presentations at national conferences on how to create reproducible workflows for clinical scientists that resulted in a >90% signup rate for reproducible workflow tools: [Link to Presentation Slides](#)

Skills

- Expert in R and RStudio (tidyverse, tidymodels, torch, shiny, rmarkdown)
- Familiar with Python (NumPy, Pandas, Scikit-learn, Keras)
- Familiar with SQL
- Git and Github
- Time Series Forecasting
- Multivariate Data Analysis

Some stuff about me

- I've published over 20 technical papers that have been cited nearly 1,000 times
